Elsevier workshops for editors

Agenda

15:00-15:10 Opening of the seminar

15:10-16:30 Scopus selection criteria and process

The purpose of this seminar is to comprehensively present the selection criteria, as well as the selection process which is carried out by the independent Content and Selection Advisory Board, and resulting in expansion of the list of indexed journals in Scopus. Editors will have an opportunity to also learn what are the best practices in preparing a journal for Scopus evaluation.

16:30-17:00 Coffee break

17:00-18:00 Scopus as a support in editorial activities

Whether it is manuscript or author screening, selection of reviewers or even expansion of the editorial board, data in Scopus prove to support evidence-based decisions made by the editors in their daily work. During the training, best practices from major journals will be presented and illustrated by several on-line workflow examples.

All sessions will be conducted in English by Dr Katarzyna Gaca-Zajac, Customer Consultant for Central-Eastern Europe in Elsevier.
