

## **Marko Šundov PhD**

Email: [msundov2@gmail.com](mailto:msundov2@gmail.com)

Marko Šundov received his PhD from the Faculty of Economics, University of Rijeka under the mentorship of professor Dragomir Sundać.

He was born in Split, and after high school he graduated from the Faculty of Electrical Engineering, Mechanical Engineering and Naval Architecture in Split, the Faculty of Maritime Studies in Split and the Faculty of Economics in Split, where he earned a Master of Science.

He started his professional business career in Brodotrogir d.d. in which he spends fifteen years performing various functions within the complex shipbuilding process. In parallel with business development, he continuously acquires theoretical knowledge through various scientific institutions, professional and scientific seminars and by participating in various development projects.

After Brodotrogir, he is the president of Stano-uprava d.o.o. whose activity includes the management and maintenance of several residential buildings. In that period, it achieved significant results in attracting funds from EU funds intended for energy renovation of several residential buildings.

He has independently and co-authored several scientific and professional articles, and co-authored a scientific book entitled "Ecological-social-market economy" (Publisher: Faculty of Economics, University of Rijeka). It directs its social action towards finding balanced models of progress with a focus on the conservation of natural resources. Through his scientific work, he seeks to provide a basis for deeper reflection on the need for stronger action to raise awareness of the individual as the most important stakeholder in the exploitation of natural resources. Therefore, by changing the attitude of the individual towards the environment, we create the preconditions for his stronger and more intensive involvement in creating a society suitable for man.
